_____

Full stack web developer with an education in economics seeking career building experience in front-end web development. Currently earning a web development certification from the University of Oregon, acquiring skills in HTML, CSS, Javascript, and jQuery. Known for attention to detail and meticulous work as well as math and logic forward thinking, I strive to make applications not only interactive but well coded and as functional as possible, making it streamlined for the user and the developers. I am ready to bring apt teamwork skills combined with an ability to foresee advances in mainstream web programs to a company's software team.
